

# SECURITY KEYSAFE

## Full Description

You no longer need to leave keys with all of your visitors.

A key safe offers an extremely safe and secure method of storing your keys while giving emergency services easy access to your home in an emergency.

The C500 model key safe is the only key safe to be Police-approved.

## Features

A Key safe is a small secure metal box with a keypad, which holds keys and is mounted to an outside wall. When a user defined pin number is entered, the Key safe opens allowing access to the keys inside.

The secure box is useful means of providing access to keys to your home for services such as home care, nurses and even friends and family. No longer do you need to leave keys with all your visitors or hidden under a mat.

A key safe also gives the emergency services easy access to your home in an emergency saving valuable time.

# SECURITY KEYSAFE

## Product Technical Specification

### Which KeySafe?

We provide two all-weather Keysafe products:

The C500 Keysafe is the only police approved Keysafe, with a security rating equal to that of a front door. It is large enough to hold up to 6 keys. External Dimensions: 5 7/8" (H) x 3 1/8" (W) x 2 1/2" (D)

The inconspicuous Slimline Keysafe has a robust design and can store up to 3 Yale type keys. External Dimensions: 4 1/2" (H) x 2 1/4" (W) x 1 1/2" (D)

Both Keysafes includes a set of installation instructions and a code setting tool which must be used to set or change the code.

Both includes fixings to install onto any brick or concrete surface.

### How does it work?

Once installed and the code is set. Insert your spare key into the Keysafe and turn the lock.

Inform those who regularly need entry into your home the code. When they next visit they can enter it to gain access to the key, and then return the key upon leaving.

The Keysafe works hand in hand with our personal emergency alarm service. In an emergency, if you are unable to answer the door, we will provide the Keysafe combination to the emergency services to gain access.
